Summary

Highly skilled and dedicated front end developer proficient in HTML, CSS, SCSS, JavaScript, and jQuery with a strong focus on creating responsive web pages and implementing captivating animations. With a solid foundation in frontend development, I have successfully completed various projects, including Space Tourism, FinanceFlow, MultiPage Form, and URL-Shortener Page. These projects showcased my ability to deliver visually appealing and functional web pages while ensuring seamless user experiences.

- I continuously seek growth opportunities and I am currently expanding my skillset by learning React. My ability to effectively collaborate, adapt to changing requirements, and streamline maintenance through component-based development has contributed to the successful completion of my projects.

- In addition to my technical skills, I hold certifications in Responsive Web Design and JavaScript Algorithms and Data Structures from freeCodeCamp. These certifications validate my expertise in constructing visually appealing web pages and solving complex problems with efficient algorithms. With a commitment to staying updated with the latest industry trends and technologies, I am well-equipped to make a valuable contribution as a front-end developer.

Experience

Frontend Developer - freelance

Jun 2023 - Jun 2023 (1 month)

Project name : Space Tourism

Live page : <https://gkartsvadze.github.io/frontendmentor/space/>

- I successfully implemented captivating animations to enhance the appearance of the webpage, using HTML, SCSS, JS, and JQuery. I incorporated AOS.js to create engaging introductory animations, resulting in a lively and visually appealing page. Additionally, I seamlessly imported data from a .json file and effectively utilized promises to ensure efficient loading of images, contributing to a smooth user experience. The Figma design provided by frontEndMentor served as the foundation for this project.

Frontend Developer - freelance

May 2023 - May 2023 (1 month)

Project name : FinanceFlow

Live project : <https://gkartsvadze.github.io/projects/financial>

This design is from Figma Community by AshStudio.

- Animated the horizontal scrollbar on home page manually. Achieved blog filtering using array filtering and mapping functions. To make contact form functional I have used email.js. Achieved a collapsible FAQ section using css styling.

Developed separate header.html and footer.html components for streamlined maintenance.
As a result, the webpage offers improved functionality, user experience, and easier maintenance. Finally I constructed 6 page web with full of challenges from Figma design.

Frontend Developer - freeLance

Apr 2023 - Apr 2023 (1 month)

Project name : Multi-page form

Live project : <https://gkartsivadze.github.io/frontendmentor/multi-step-form/>

- Design from FrontEndMentor.io. This project was interesting with it's navigation between form sections on single page. I fulfilled it by changing styling of components and achieved summarizing of selected plans using data Object Oriented Programming.

Frontend Developer - freelance

Mar 2023 - Mar 2023 (1 month)

Project name : URL-shortener page

Live page : <https://gkartsivadze.github.io/frontendmentor/url-shortener/>

- Project from FrontEndMentor.io. There was challenge to implement API for shortening links. I fulfilled it by using TinyURL API, so that page now is able to shorten URLs and in addition I added function for saving and recovering links for user to not loose them after revisiting page.

Education

Batumi State Maritime Academy

Bachelor's degree, Electrical Engineering Technologies/Technicians

Aug 2018 - Aug 2022

Licenses & Certifications

 **Responsive Web Design** - freeCodeCamp

 **JavaScript Algorithms and Data Structures** - freeCodeCamp

Skills
