Summary

I've been studying front-end development for a year while working on a ship, and for the past five months, while I'm at shore, I have dedicated all of my time to improving my coding skills.

I've completed the Responsive Web Design and JavaScript Algorithms and Data Structures courses on freeCodeCamp, where I learned the basics of HTML5 and CSS, writing JavaScript algorithms, problem solving and functional programming. Currently, I'm studying the Front End Development Libraries course and practicing it. At the moment I already feel comfortable using JQuery and SCSS and using it in almost all my projects, which makes it easier to maintain my code. Last time I started using Github. I use Visual Studio Code as my code editor.

I'm passionate about this field, and I believe I'd be a good fit for any relevant job. I enjoy taking on new challenges in each project, and I find it rewarding to solve them as it helps me develop my skills. Learning programming has always been a dream of mine, and now I'm ready to turn it into a career.

Experience

Electrician

Naftomar Shipping And Trading Co. Ltd. Inc.
Sep 2022 - Dec 2022 (4 months)

Assistant Electrician

Naftomar Shipping And Trading Co. Ltd. Inc.
Nov 2021 - Apr 2022 (6 months)

Education

Batumi State Maritime Academy

Bachelor's degree, Electromechanical Engineering
Aug 2018 - Aug 2022

Licenses & Certifications

Responsive Web Design - freeCodeCamp

JavaScript Algorithms and Data Structures - freeCodeCamp

Skills

Object-Oriented Programming (OOP) • Leadership • Problem Solving • SCSS • Russian •
Responsive Web Design • Git • HTML5 • Web Development • Front end
